

M HEALTH FAIRVIEW UNIVERSITY OF MINNESOTA MEDICAL CENTER and MASONIC CHILDREN'S HOSPITAL PGY1 Pharmacy Residency

Program Overview

The Pharmacy Residency Program (PGY1) is a 54-week program located at the M Health Fairview University of Minnesota Medical Center.

At the M Health Fairview University of Minnesota Medical Center, we balance the latest in technology and treatments with patient-centered care. As the core teaching hospital of the University of Minnesota Medical School and College of Pharmacy, our hospital is among the most respected in the nation, providing superior health care results. The Pharmacy Residency Program consists of direct patient care experiences in medicine, surgery, critical care, pediatrics, and various specialty areas. Each resident's experience is tailored to individual interests and clinical skill development needs. The program focuses on the development of clinical, leadership, and teaching skills.

PGY1 Purpose: PGY1 residency programs build upon Doctor of Pharmacy (PharmD) education and outcomes to develop pharmacist practitioners with knowledge, skills, and abilities as defined in the educational competency areas, goals, and objectives. Residents who successfully complete PGY1 residency programs will be skilled in diverse patient care, practice management, leadership, and education, and be prepared to provide patient care, seek board certification in pharmacotherapy (i.e., BCPS), and pursue advanced education and training opportunities including postgraduate year two (PGY2) residencies.
